

## **CHAPTER V**

### **CONCLUSION AND SUGGESTION**

In this chapter, the writer would like to presents some conclusions and suggestions based on the data analyzed.

#### **5.1 Conclusions**

Based on the data analysis and discussion, the conclusions are as follow:

1. All of English emotion words tested have been acquired by 50% and more of the students.
2. In terms of acquisition of words of each category, the most acquired words belong to the category of **surprise (92%)** and the least acquired words belong to the category of **fear (78%)**.

#### **5.2 Suggestions**

Based on the result of the data analyzis in this study, another side shows that the students could increase their vocabulary through vocabulary test of emotion words. So the writer would like to give some comments dealing with the findings:

##### **1. For English Teacher**

To increase their vocabulary, the teacher should give the student vocabulary test to increase their vocabulary in the future.

## **2. For the Students**

They should increase their vocabulary, the students have to know what English emotion words which have been acquired.
