

CHAPTER V

CONCLUSION AND SUGGESTION

In this chapter the writer draws some conclusion and suggestion based on the data analysis of this study.

5.1 Conclusions

Based on the result of data analysis this study concludes that:

1. There are 5 groups of students based on their level of ability. Excellent level, very good level, good level, fairly good level, average level.

The ability level of the eighth grade students of SMPN 10 Kupang in the school year 2018/2019 in reading comprehension is “good” (7,7)

2. The difficulties encountered by the students are how to understand the whole text. It based on the answers given by the students when the writer asked personally to them in the class after they finished the test and it can be seen also from their answer on work sheet where most of the incorrect answers were about the main idea of each texts.

5.2 Sugestion

Based on the result of the discussion, the writer would like to over some suggestion, as follow:

1. For the Students of the researched school

Even though the result has showed that the students reading comprehension ability is a good level. They still need to maintain the reading skill by doing some reading comprehend test at home to reach very good level or excellent level.

2. For the teacher of English of the researched school

Even though the result has showed that the students reading comprehension ability is a good level. However, more efforts are still needed to improve the students level of ability.

3. For the other researchers

For the other researcher, this study can be a refrence to do other reading comprehension studies. They may do a reading comprehnsion study by using other type of reading comprehension such as critical reading, interpretative reading, literal reading, creative raeading.
