

CHAPTER V

CONCLUSSION AND SUGGESTION

In this chapter, the writer would like to draw some conclusions and suggestions based on the result of analysis and discussion.

5.1 Conclusion

Based on the analysis and discussion in the previous chapter the conclusions are as follow:

1. The eight grade students of SMPK Shanti Karya Kupang are able to use preposition of time in the sentence.
2. The result of the study indicated that the ability of the students in using preposition of time was 8.15 and it was classified as ‘‘good ‘’level of ability. The individual level of ability in using preposition of time can be classified in the following: it can be proved that from 13 students, 1 student (7.69%) got excellent level of ability, 5 students (38.46%) got very good level of ability, 2 students (15.38%) got good level of ability, 3 students (23.07%) got fairly good level of ability and 2 students (15.38%) got average level of ability.

5.2 Suggestions

Based on the conclusions of the study the writer would like to give some suggestions as follows:

1. **For Teacher**

In order to maintain and increase the student's ability in using the preposition of time the teacher should give the student more explanations and practices about how to use preposition in sentences. The explanation and practice should focus on types of preposition of time because the student of SMPK Sahnti Karya Kupang in the school year 2014/2015 still made mistakes in using preposition in sentences.

2. For the student

In order to maintain and increase their ability in using the preposition of time the student should do more exercises about the use of preposition in sentences. The practice can be done in the classroom or at home by doing the homework. By doing this the students are expected to master the preposition of place and time as one of the English sentence types which might help them to communicate in English well with other people in their daily life.

3. More practices and exercises are needed by the students to use preposition of time (on, in, at, from and to) as preposition in sentence because it is very helpful for the students to enrich their vocabulary and to communicate in English well with other people in their daily life.
